***Detailed Action***

**Claims 9-25** are pending.

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

1. Figure 6 discloses a variation of a visual processing device
2. Figure 7 discloses a variation of a visual processing device
3. Figure 8 discloses a variation of a visual processing device
4. Figure 9 discloses a variation of a profile data registration device
5. Figure 11 discloses a variation of a visual processing device
6. Figure 14 discloses a variation of a visual processing device
7. Figure 15 discloses a variation of a visual processing device
8. Figure 16 discloses a variation of a visual processing device
9. Figure 19 discloses a variation of a visual processing device
10. Figure 20 discloses a variation of a visual processing device
11. Figure 21 discloses a variation of a visual processing device
12. Figure 22 discloses a variation of a visual processing device
13. Figure 23 discloses a variation of a visual processing device
14. Figure 24 discloses a variation of a visual processing device

16. Figure 34 discloses a variation of an actual contrast setting portion
17. Figure 36 discloses a variation of a visual processing device

Art Unit: 2629

18. Figure 39 discloses a variation of a visual processing device
19. Figure 40 discloses a variation of a visual processing device
20. Figure 41 discloses a variation of a visual processing device
21. Figure 42 discloses a variation of a visual processing device
22. Figure 43 discloses a variation of a visual processing device

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.**

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction

requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

***Response to Arguments***

Applicant's arguments filed 5/29/2009 have been fully considered and issues relating to the elected species will be addressed by examiner following the election.
